

DF3 Series

# 2mm Pitch Connector for Discrete Wire Connection (Product approved by UL CSA Standard)

# **Features**

# 1. Correspond to Board Design in Wide Variation

#### Crimp Socket

- (1) Low profile design with mounting height 7.5mm. (See the application chart.)
- (2) Provide the contact crimping area with the sufficient space, and secures the stable crimping operation.

#### Pin Header

- (1) The board pre-fixed kink is treated with the post pin.
- (2) The shape is a box type that is resistant to wrenching.
- (3) The type corresponding to SMT is available, using the heat-resistant resin.

This SMT header is equipped with the retention tab to prevent peeling in the solder joint area.

#### ● In-Line Plug

There are two types of crimp in-line plugs: a type designed for space merit and a panel lock type that can be fixed to a panel.

# 2. UL, CSA Certified

# **Application**

General office automation equipment such as copiers and printers

# **Product Specifications**

Rated	ent Crimping 2A / pip 2A / pip 1A / pip		Operating Temperature (Note 2)	-55 to +105℃		
Current (Note1)			2A / pin 1A / pin		Operating Humidity Range (Note 3)	40 to 80%
Rated Voltage		250V AC/DC			Storage Temperature Range (Note 4)	-10 to +60℃
					Storage Humidity Range (Note 4)	40 to 70%

UL-CSA	Rated Current	24 AWG	26AWG	28 AWG	
		3A / pin	2A / pin (Note 5)	1A / pin	
	Rated Voltage	30V AC/DC			

UL, CSA File No. UL: E52653 CSA: LR95109

Item	Standards	Condition
Insulation Resistance	1,000M Ω Min.	Measured at 500V DC
Withstanding Voltage	No flashover or dielectric breakdown	650V AC for 1 min.
Contact Resistance	30m Ω Max.	Measured at 20mV Max., 1mA
Vibration Resistance	No electrical discontinuity of 1 $\mu$ s or more	Frequency 10 to 55 Hz, Half amplitude 0.75 mm, 2 hours in each of the 3 directions
Humidity Resistance	Contact Resistance : $30m\Omega$ Max. Insulation Resistance: $500M\Omega$ Min.	96 hours at temperature of $+40 \pm 2^{\circ}\!$
Temperature Cycle	Contact Resistance : $30m\Omega$ Max. Insulation Resistance: 1,000M $\Omega$ Min.	-55°C : 30 minutes → +5 to +35°C : 2 to 3 minutes → +85°C : 30 minutes → +5 to +35°C : 2 to 3 minutes, 5 cycles
Mating Durability	Contact Resistance: 30m Ω Max.	Tin Plating : 30 times Gold Plating : 50 times
Solder Heat Resistance	No dissolution of the resin part affecting performance.	Dip Type Flow: $+260^{\circ}\text{C}$ , $10\text{sec.}$ / Hand Soldering: Soldering iron temperature $+300^{\circ}\text{C}$ , for 2 sec. SMT Type Reflow: Recommended in Temperature Profile / Hand Soldering: Soldering iron temperature $300^{\circ}\text{C}$ for 3sec.

Note 1: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

Note 2: Includes temperature rise caused by current flow.

Note 3 : Use without condensation.

Note 4: Apply to unused product on packaged condition.

Note 5: The mating side is a crimp type.

Note 6: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

# Materials / Finish

Note 1: Issues with non-Hirose specified tools are outside the scope of warranty.

Note 2 : Please conduct crimping work according to the Crimping Quality Standard "ETAD-H0958-00 and ETAD-H0959-00" and Crimp Conditions.

Note 3: If you do not use our specified tools, please contact our sales representative for consultation on providing drawings.

#### **Precautions for Crimping**

#### ■Items Required Prior to Starting

The work-related documents listed below are required before starting harness assembly.

(The ● mark indicates a required document.)

When the documents shown below are not available, ask a Hirose sales personnel to provide them

Document Title	Description	Automatic Crimping Machine	Hand Crimping Tool	Remarks	
① Instruction Manual for the Crimping Machine Main Unit	Explanation of main press machine unit	•	-	Bundled with the purchase of the main press machine unit.	
② Applicator Handling Instructions	Crimping Operation Method				
③ Applicator Spare Parts Identification	Explanation for Applicator installation	•	-		
③ Crimp Conditions	Standard values of : Crimp Height, Tensile Strength	•	-	Bundled with the purchase of applicator.	
(4) Crimp Quality Standards ETAD-H0958-00 ETAD-H0959-00	Various standards for crimping conditions	•	-		
(§) Operating Instructions for Hand Tool	Crimping Operation Method Standard values of : Crimp Height, Tensile Strength	-	•	Bundled with the purchase of hand tool.	

#### **Tools**

Use tools designated by Hirose when crimping.

- ·Crimping performed using tools other than those specified is outside the scope of warranty.
- ·The operating instructions manual is available for the crimping machine and the applicator.

Be sure to carefully read the operating instructions manual before implementing the work.

#### ■ Applicable Electric Wires

When using a wire other than the applicable wires please contact a Hirose representative.

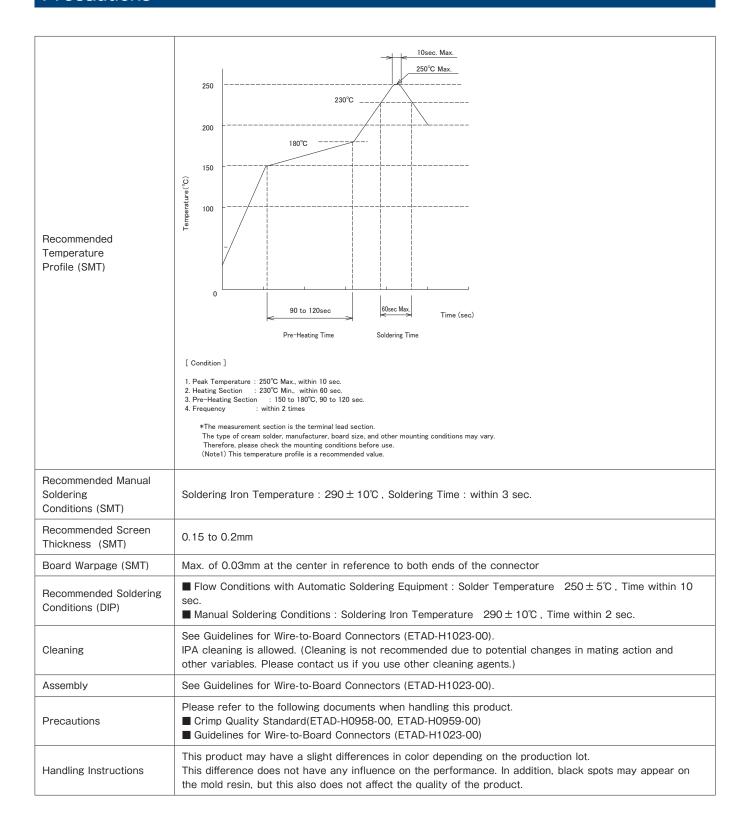

#### [Precautions]

- · Electric wires that are suitable for crimping connectors are tin-plated stranded soft copper wire.
- · Avoid crimping solid wires, wires with polyester threads or tin-coated wires.
- · Avoid crimping two electric wires together.
- ·The crimp height setting value (Note) may vary between tin-plated and gold-plated contacts even if the same electric wires are used.
- ·The crimp height setting value (Note) may vary depending on the difference in the core wire configuration even if the computed cross-sectional area is the same.

Note: The crimp height is an important item that determines crimping quality.

We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.

#### **Precautions**

### While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please review the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, the warranty of the product may be affected.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/defense etc. Hirose must review before assurance of reliability can be given.
